Since 1981 year after year AQUARENA has set new standards in the design and construction of slide systems and adventure worlds for children across Europe and provides everything from a single source: from concept, design, engineering, manufacturing and installation to commissioning and TÜV inspection.

AQUARENA builds multifunctional water areas that make children's hearts beat faster, with great emphasis on safety and quality.

We guarantee the highest possible safety standard. The AQUARENA slide system corresponds to European standard EN 1069 and all applicable directives.

Safety, quality, innovation and fun – that's AQUARENA.

Ferien- und Freizeitpark Weissenhäuser Strand, Weissenhäuser Strand.

FUN IS OUR BUSINESS!

SWIMMING POOLS BECOME WORLDS OF ADVENTURE

Open waterslide complexes appeal to a large target group. The slides are suitable for young and old, and exciting competitions often take place between bathers during their visit. Unadulterated fun! AQUARENA waterslide complexes are available in 6 different sizes.

Different turn radiuses, straight sections and acceleration elements guarantee variety and sliding enjoyment.

AQUARENA plans all slide complexes individually. Our own Serviceteam is responsible for installation and also for after sales service.

AQUARENA tube slides are available in 5 different diameters, as complete black tube (Black Hole) or with colorful design, it's your choice! Crystal elements are special eyecatchers. We manufacture our CrystalTube straight or curved.

Different light- and sound effects and a creative planning guarantee an exciting ride. We are able to deliver all our tube slides with insulation.

Insulation provides energy cost savings through heat and sound protection for the operator, and noise protection for surrounding inhabitants.

Center Parcs,
Park Bostalsee.

CrystalTube.

TUBE SLIDES – ALL-ROUND FUN

WATERFUN FOR THE WHOLE FAMILY

Three in one – the TrioSlide is a freefall, wave and wide slide in one.

Kids are guaranteed to have plenty of fun with the varied TrioSlide. The TrioSlide provides a varied ride. And is a real space-saver. Even with integrated fiberglass safety steps and a starting platform, it requires minimum space. This means that the procurement, installation and operating costs are accordingly low for the operator. Other benefits: high capacity and excellent price-performance ratio.

AQUARENA's AquaWide slides are classic family slides. The moderate starting height creates a pleasant speed that will appeal to bathers of all ages. With an AquaWide there is little or no waiting time for guests. Also available with individual slide separation of 2 to 4 slides.

A small-format AQUARENA slide transforms the children's area of your pool a great attraction and a magnet for families. And if the kids are having fun, the parents are guaranteed some relaxation. Our kid's slide is an eye-catcher and particularly suitable for adding excitement to formerly plain paddling pools.

Giant slides in a small format provide plenty of fun for little ones.

Sonnentherme,
Lutzmannsburg.

Technical Data FamilyFun

water slides

OPERATIONAL DATA

Type:	Waterslide WR0600, WR0900, WR1200, WR1500, WR2000, WR3000
Use:	body slide WR 0600, WR0900, WR1200 Inner-Tube WR1500, WR2000, WR3000
Minimum age:	from 6 years, kid's slides from 3 years
Speed:	< = 8 m/s = 28,8 km/h
Capacity:	Bodyslide 150 persons/h, Inner-Tube 250 – 1000 persons/h

TECHNICAL DATA

Landing:	splashdown (bodyslide), safety run-out, safety landing pool, shallow water run-out
Material:	fiberglass, translucent or opaque, RAL color
Water volume:	20 – 1000 m³/h

OPTIONS

- Time measurement, traffic lights

tube slides

OPERATIONAL DATA

Type:	Tubeslide RR0825, RR1200, Inner-tube RR1500, RR2000, RR3000
Use:	body slide RR0825, RR1200 Inner-Tube RR1500, RR200, RR3000
Minimum age:	from 6 or 8 years, kid's slides from 3 years
Capacity:	Bodyslide 150 persons/h, Inner-Tube 250 – 1000 persons/h

TECHNICAL DATA

Landing:	splashdown (bodyslide), safety run-out, safety landing pool, shallow water run-out
Material:	fiberglass, translucent or opaque, RAL color
Water volume:	40 – 1000 m³/h

OPTIONS

- Light and sound effects
- Themes
- Time measurement, Traffic lights
- Heat insulation, Sound insulation

AQUARIVER – PURE CANYONING

Sometimes tame and sedate, sometimes wild and untamed like a white water river. Turns and intermediate pools in free-form style leave no wish unfulfilled and allow ambitious design options even with difficult layouts. The AquaRiver can also be run an open outdoor slide even in winter. The strong, powerful current gives the rider a completely new sliding experience.

Need the Speed? The AquaRacer is a varied tube slide with different diameters, long, wide, straight sections and tight turns. Different gradients set an exciting tempo – get that race feeling!

A high fun factor is guaranteed when several people speed down the slide in double, triple, or multi-person Inner-Tubes.

AQUARACER – PURE RACEFEELING

AquaRacer, NCL –
Norwegian Escape.

Technical Data RiversAction

AquaRiver

OPERATIONAL DATA

Use:	Bodyslide
Minimum age:	8 – 12 years, depending on type, confident swimmers only
Speed:	5 m/s = 18 km/h
Capacity:	1500 persons/h

TECHNICAL DATA

Slide length:	from approx. 40 m
Starting height:	~ 2 – 4 m
Slide diameter:	WR1200, WR1500, AR0900 with or without intermediate pools
Landing:	individually formed landing pool
Material:	fiberglass, opaque, RAL color
Water volume:	1500 – 2000 m³/h

OPTIONS

- Water curtain
- Tunnel cover
- Light effects
- Shutter closing upon
penetrating facade

AquaRacer

OPERATIONAL DATA

Use:	Inner-Tube, 1, 2 and 3-person tubes
Minimum age:	6 years
Capacity:	up to 1400 persons/h with a double start

TECHNICAL DATA

Slide diameter:	combination of diameters AW2500, RR1500, RR2000, RR3000, MT2500
Landing:	shallow water run-out ~ 10 m length
Material:	fiberglass, translucent or opaque, RAL color
Water volume:	360 – 500 m³/h

OPTIONS

- Light and sound effects
- Themes (racer design)
- Traffic lights

BOOMERANG – ANYTHING IS POSSIBLE

Take a tube on the Boomerang, which begins with a narrow slide. It ends in a four meter-wide slide, which takes the rider uphill, then backwards or forwards – depending on their skills – then uphill again. What an experience!

Increase the attractiveness of your pool with a spectacular, unique slide: the Boomerang. The Boomerang provides a completely new type of sliding enjoyment. The slide is suitable for bathers aged 8 and older.

Boomerang, Aqualand Moravia.

AQUACRATER – SIMPLY GIGANTIC

Sliding through the AquaCrater is a whole lot of fun. The sliding experience on the mega slide is simply unbeatable! The AquaCrater itself is in the form of a giant cone with a width of 18 meters and it's one of the top attraction in water parks.

Riders start out on the AquaCrater with a three meter-wide slide. Halfway along the route the slide closes into a tube with a gigantic diameter of three meters. At the end, this monster tube empties into the AquaCrater. The generous diameter of the tubes means that it can be used with all multi-person tubes and boats.

The multi-person rafts build up some momentum whilst traveling down the slide and slide up and down several times in the AquaCrater. You ride the whole AquaCrater in this way until the rafts enter to the slide at the end and are guided into the end pool.

AquaCrater,
Miramar, Weinheim.

AQUACONE – A WILD TUNNEL

Open AquaCone,
EurothermenResort
Bad Schallerbach.

The AquaCone is ideal for those who like it wild. The slide is like a crazy rollercoaster ride. Sharing the ride with friends on a multi-person inner tube is also great fun and can get addictive!

Technical Data SwingSlide

Boomerang

OPERATIONAL DATA	
Type:	Boomerang
Use:	tubeslide, 1, 2, 3 and 4-person tubes
Minimum age:	8 years
Speed:	10 m/s = 36 km/h
Capacity:	200 – 700 persons/h

TECHNICAL DATA	
Slide length:	from approx. 30 m
Starting height:	5 – 16 m
Slide diameter:	AWL, RR1500, WR1500, RR2000, WR2000, RR3000, WR3000, AW2500, AW4000
Landing:	shallow water run-out or surf landing
Water volume:	250 – 450 m³/h + 20 – 30 m³/h

- OPTIONS**
- Themes
 - Sensor controlled traffic light

AquaCrater

OPERATIONAL DATA	
Type:	AquaCrater
Use:	tube or raft slide, use with 3, 4 or 6-person rafts
Capacity:	360 or 500 – 700 persons/h

TECHNICAL DATA	
Slide length:	50 – 100 m, plus AquaCrater, diameter 18 m
Starting height:	12 – 18 m
Slide diameter:	WR3000, RR3000 + AquaCrater D = 18 m
Landing:	surf landing in pool or shallow water run-out
Space requirement:	approx. 55 m x 26 m or 45 m x 35 m
Water volume:	1000 m³/h

- OPTIONS**
- Traffic lights
 - Designed as closed tunnel (AquaCone) for year-round use
 - A tube lift is recommended for larger tubes

AquaCone

OPERATIONAL DATA	
Type:	transition to waterslides or tubeslide
Use:	tube slide, use with 1, 2, 3, 4-person tubes
Minimum age:	8 years
Capacity:	180 or 360 – 700 persons/h

TECHNICAL DATA	
Slide length:	approx. 7,5 m, variable
Slide diameter:	4,50 m at entry, 1,50 m at exit
Landing:	AquaCone is a transition
Water volume:	2 x 100 m³/h

AQUABOWL – A UNIQUE FUNNEL SLIDE

AquaBowl,
Miramar, Weinheim.

The AquaBowl funnel slide is a unique slide with a high thrill factor. The funnel can be used as a bodyslide or tubeslide, with single or even with double inner-tubes. Guest enjoyment is guaranteed. The more experienced the rider is, the more rounds he can do in the funnel. When the speed drops, the rider slides into a giant "gullet", which leads into the end slide and finally to a safe landing in the pool.

The funnel slide can be operated outdoors or indoors. Various light and sound effects provide an additional attraction. Video transmission of the inside of the slide is available for supervision.

BODY²RACER AND TUBE²RACER – RACE TO THE POWER

Body²Racer, Ferienzentrum
Schloss Dankern, Haren (Ems).

Who's the fastest? This kind of slide means thrilling high speed – man to man as Body²Racer or Tube²Racer. It is possible to use the Body²Racer with mats or just as Bodyslide. The Tube²Racer can be used with single or double innertubes.

Body²Racer, Ferienzentrum
Schloss Dankern, Haren (Ems).

FOR THE FAST AND THE FUN

Two slides with exact the same length, open or enclosed. Thanks to the time recording feature the competition element is enhanced further. Light and sound effects evoke a sense of racing fever among the bathers, just like the time recording feature and Photosystem AquaClick.

Body²Racer,
Norwegian Gem.

The Body²Racer invented as competition slide really invites riders to slide again. Here, each against all in an exciting battle! Who can resist a re-run if they might come out on top?

AQUALOOP – TURNING THE WORLD ON ITS HEAD

Two times double adrenaline: The Double AquaLoop at Erlebnisbad Miramar at Weinheim and at Wörgler Wasserwelt in Tirol (right).

AQUARENA has turned the world of slides on its head with the development of the AquaLoop with AquaRocket. The AquaLoop is a crowd-puller. Visitors' excitement is palpable at every second. Pure adrenaline!

The trap door opens and riders drop virtually in freefall. The fast ride leads to a nearly vertical loop, where the surprised rider learns to overcome gravity. When you arrive at the bottom, take a minute to gather your composure: it was quite a ride!

Spectacular Start for the AquaLoop and an absolute novelty in the world: The first curved CrystalTube at Calypso, Saarbrücken.

TURBOSLIDE – HIGHSPEED SLIDE MEANS RECORD BREAKING

Sliding championships on the TurboSlide are a real hit! With a time measurement system, riders don't just want to be faster than others, they also want to beat their personal best – or even break the record for the day!

The TurboSlide is fast, bendy, varied and really fun. Thanks to the tongue and groove system with low-maintenance resin joint filling, the joints can hardly be felt.

The high-speed slide with a rocket launch: TurboRocket. Seamless tube slide without lengthwise flanges, with AquaRocket and self-launch, guarantees the maximum adrenaline rush.

TurboSlide.

AQUAROCKET – THE ROCKET LAUNCH WITH A TRAP DOOR

Enter zero gravity through a door. The glass panel at the start of the rocket ride not only gives a view into the void, but provides bystanders with a glimpse of the brave person about to rocket launch onto the water slide. Once the access door has been closed, the countdown begins. Three-two-one... In this moment, the adrenaline flows through every vein in your body. The trap door opens; there is nothing left to hold you. You fall into the abyss.

AquaRocket offers maximum thrills. Adrenaline is guaranteed. Spectacular for the user and the spectator.

Also available with self-release.

EAGLEDIVER – THE NEW TAKEOFF FOR TUBESLIDES

Numerous Example of Design
New start for tube slides: EagleDiver
Patent pending

In the planning phase we visualize
the later results in detail with elaborate
illustrations or renderings.

Numerous Example of Design
New start for tube slides: EagleDiver

Patent pending

Whether the ride brings you into the
galaxies or along steep mountains, or
anywhere else you can imagine, it is your
decision – it is your theming.

Technical Data EagleDiver

OPERATIONAL DATA

Type:	starting element for tubeslides like Freefall and AquaLoop
Usage:	Single or double Inner-Tubes
Minimum Age:	12 years

TECHNICAL DATA

Slide diameter:	RR1500/WR1500
Landing:	safety run-out, shallow water run-out
Material:	fiberglass, translucent or opaque, RAL color

OPTIONS

- Light and sound effects
- Timecontrol
- PhotoSystem – AquaClick

TUBE²RACER AND QUATTROSLIDE

JUMPINGBULL –THE DOUBLE-ACTION LAUNCHER

Guaranteed to provide a very special ex-
perience: self-launch and countdown –
plenty of courage goes a long way! 3-2-1,
the countdown goes and soon you are
flying over the water. Well suited to diving
pools for other uses. Fun to the power of
ten, for spectators and riders.

AQUARENA ON THE HIGH SEAS

AquaLoop and AquaRacer,
NCL – Norwegian Escape.

Since more than 10 years we successfully equip cruise ships with children's adventure worlds. What started years ago with a small water slide has become an attractive and multifunktional waterpark.

AquaFun, NCL –
Norwegian Escape.

RANKING

AQUAFUN – THE WATER PARK FOR YOUNG FAMILIES

Dilly's Wellnesshotel,
Windischgarsten.

We guarantee you an increase in visitor numbers and families as satisfied repeat customers with the new AquaFun water park. It makes water an experience!

More than 30 play and water attractions guarantee no end of fun, action and adventure. Various water slides, crawl pipes, tipping buckets, water wheels, spray cannon, water jets, climbing nets and bridges invite you to play, move and mess around.

By building more than one level, the space of even very small areas (from 70 m²) can be used effectively. The AquaFun water park is completely customized to your choice and to your facility.

The Highlight at Schloss Dankern, Haren:
A large tipping water bucket with capacity of up to 1500 liters which empties with a splash.

AQUAFUN – FUN, ACTION AND ADVENTURE

Gumbalino, Gummersbach.

The AquaFun water park works its magic on the visitor, who will while away the hours there. At long last – a waterpark for children between 4 and 14!

Gumbalino, Gummersbach.

Gumbalino, Gummersbach.

PLAY SHIPS – PERMISSION TO COME ON BOARD

Pirate Land,
Fürthermare, Fürth.

Your children's areas will become islands of discovery with our wide range of themed play equipment. The little ones will just lose all track of time with the variety of water attractions as they pump, spray, dam, shoot and shower – in no time at all.

In our range we have Archimedes spirals, gold panning areas, treasure chests, spray and bubble stones, steering wheels, dams, water courses, tipping bucket trees, sailing games, fixed or pivoting cannon, barrel showers, water wheels, tipping buckets, waterfalls, handle pumps, trees, and much more.

With one of our play ships, anyone can be a pirate and paddle in the water to their heart's content – kids and adults alike. The pirate ship offers water slides, spray cannons, climbing areas, sailing games and tipping buckets which promise an unexpected shower. Hidden floor jets can be controlled using the ship's wheel, great fun for the helmsman.

The ship is made individually in accordance with the clients' instructions and adapted to the requirements on-site. Other features are the solid sub-construction, anti-slip standing areas and chlorinated water resistant material.

The Nautilus.

ARTLINE – WELCOME TO THE LAND OF ADVENTURE

KAI, the shark,
Europabad Karlsruhe.

The mexican land of adventure
Maya mara at Halle/Saale.

Our into detail themed children's areas tell a
lot of adventurous stories.

Pirate Land at
Fürthermare, Fürth.

In close collaboration with our clients, we produce pools, ships, buildings, animals and machines to suit the widest range of themed worlds imaginable. A giant mouse world, a secret pirate bay or a forgotten Inca temple – we create landscapes where kids can play to their heart's delight. We design a large or small play landscape with all kinds of interactive play elements, which are worth exploring. A real dream-world for kids.

A beautiful kids' pool invites the little ones to linger a little. A pleasant coating on the floor and integrated water attractions make you lose all sense of time. Kids' slides, spraying animals, bubbling stones, water wheels and the like – fantastical concepts guarantee success.

New constructions enable spectacular designs for childrens' pools. Likewise an installation afterwards increases the value of the whole pool.

OUR HISTORY

1981
Founded by Uwe Hartwigsen.

1991
Manufacture of components in RTM process with an absolutely smooth surface.

1996
Reformation of the AQUARENA Freizeit-anlagen GmbH due to takeover of the slide division of KVS, Krems, Austria. Transfer of shares by Uwe Hartwigsen to Jochen Bohnet, Rainer Braun and Jörg Hartwigsen.
Development and construction of the first seamless tube slide.

1998
Reformation of FGTT due to takeover of the slide division of the company SGGT. Uwe Hartwigsen retires from the company.

1999
Development and construction of the first heat and sound insulation.

2000
Development of the AquaRiver.

2002
First children's adventure worlds built.

2003
Construction of the world's first glasstube slide – CrystalTube.

2004
Merger with FGTT.

2006
Move to new premises in Jettingen.

2007
Development of AquaRacer, AquaChoice, AquaRocket and AquaLoop.

2008
Construction of the world's first looping water slide AquaLoop with AquaRocket.

2010
Construction of the world's first double looping slide Double AquaLoop.

2012
Construction of the first newly developed kids' areas AquaFun.

2012
Development and construction of the climbing wall SkyClimbing.

2013
Construction of the AquaCrater.

2014
New joint company identity of AQUARENA Freizeitanlagen GmbH Austria, and Hartwigsen Freizeitanlagen GmbH Germany as AQUARENA GmbH.

2015
CrystalTube curved, Body²Racer, Tube²Racer, AquaCone, QuattroSlide and AquaCoaster.

2016
Construction of the QuattroSlide, Body²Racer and the AquaCone.
